

Overview

The Advanced LMS was designed to ease the learning process and meet client's need. It is a fully integrated learning environment based on active self-learning and collaboration, it is considered as Knowledge gate for the schools to be applied and reflected on the actual life. So we can say it is a Saudi local e-learning Model that is equivalent to international systems in quality and education standards.

Challenges

- Add parent services.
- Integrate with "Nour" system.
- Add new roles to moodle
- Academic year setting (open new year/close year).
- Math editor.
- Evaluate teachers' performance via supervisors.
- Availability of digital learning objects(Video, simulation, interactive) via LMS

Solution

- Develop parent services module that allows them to track their children progress and exams scores in addition to communicate with teachers.
- Develop e-preparation module that allows teacher to set up lesson plan directly.
- Help desk includes:
 - Technical support 24/7
 - Training packages
 - Tutorial Video
 - Knowledge base
- Add Hijri calendar(umm alqura calendar)
- Control panel to integrate student information's from "Nour" system.
- Smartphone applications & special need support
- Integrate with digital repository (more than 1 million learning objects)

Conclusion

- Increase parents' satisfaction in further communication with teachers, and ease the burden of follow-up sons.
- Improve learning outcomes.
- Increase the efficiency of teachers.
- Ease to measure teachers' performance.
- Increase admission & registration in schools by 20%
